

PROJECT -a- PHONE

The new Project-a-Phone™ Case Reporting module lets you combine information about the case and phone with collected screen shots and video recordings to create a case report.

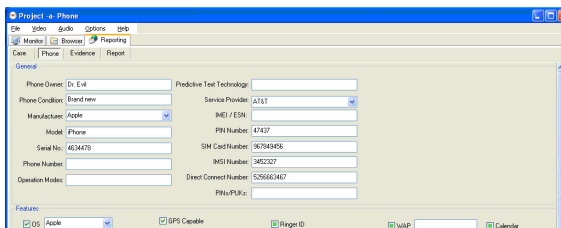

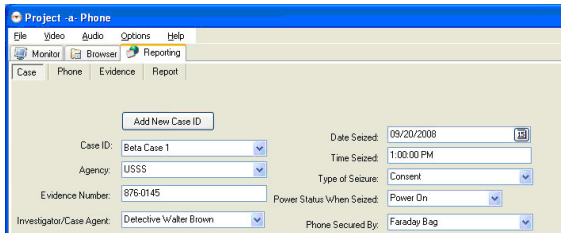

Capture evidence

In the Monitor tab, take screen shots or record videos, classify the evidence with a Case ID and Report Code, and add notes if desired.

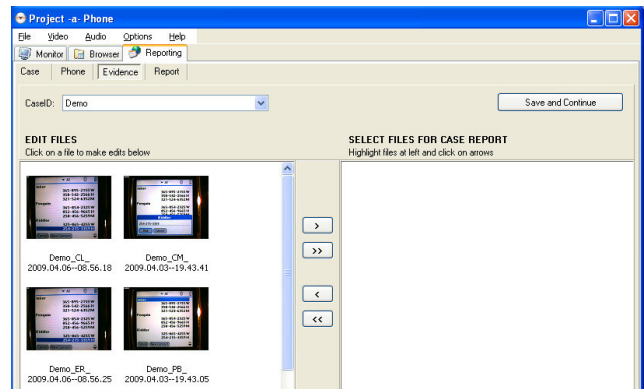

Record case and phone info.

In the Case and Phone tabs, quickly capture information using “smart” dropdown menus that remember information you’ve entered previously.

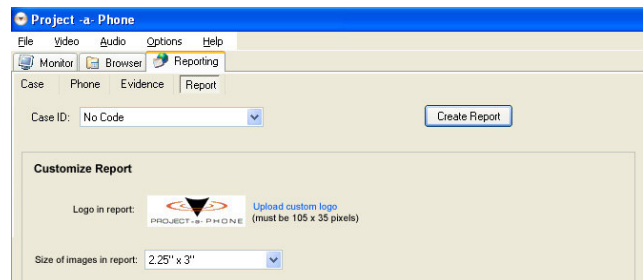

Choose evidence for the report

In the Evidence tab, the Change Case IDs or Report Codes, add or edit notes, and then select which evidence to include in the report.

Generate automatic case reports

Automatically create case reports in html, pdf, or rtf formats that combine the information about the case and phone with all the evidence. Evidence is grouped according to report code and presented along with any added notes.

Purchase Information

The price is \$275 if purchased separately or \$100, if purchased with a Project-a-Phone imaging device.
